What's in a Name

FIRST a design on paper—then the expert craftsmen take a hand—and another fine Radio Receiver—a set we are proud to offer, a set you will be proud to own—joins the Music Master range. No product is better than the organisation which produces it. Nothing better reflects the standard of a firm than the quality of the goods it makes. Our responsibility now is to maintain and strengthen the standards laid down at Music Masters 15 years ago: To build with integrity, price fairly, and follow up with friendly service. On this firm foundation we have established our name. We at Music Masters feel confident that your judgment of this new range of Radio Receivers will further enhance our pride in a job well done.

MUSIC MASTERS RADIO CO.

Built for You

IT is fifteen years since we at Music Masters turned out our first Receiver. In that period nearly 50,000 Sets have been supplied throughout the length and breadth of Queensland. Music Masters technicians have experimented in the scorching dry heat of the West, and the humid heat of the Coastal areas, and the experience gained is built into every set, resulting in a Radio Receiver ideal for Queensland conditions. Whatever extremes of climate your Music Master may operate in, you can be sure it is engineered to "take it." Efficient production methods, and low distribution costs, bring these sets to you at a price which represents the best value offering in Australia to-day.

MUSIC MASTERS RADIO CO.

Consider these Facts

THREE year guarantee is our practical way of expressing to you our confidence in the quality of every Music Masters Set made. Music Masters Receivers are designed and built in our own modern factory, in Stanley Street, South Brisbane. The factory covers floor space of 15,000 square feet, and a large staff of highly qualified technicians, working with the most modern equipment, are busily employed meeting the demand for more and more Music Masters Receivers. Music Masters make the full range—from the Console, fit to grace any lounge, to the little "second" set, and the friendly Portable.
